LG COMMERCIAL TV HIGHLIGHTS

OLED Technology & Design

LG commercial TV is created with the innovative OLED technology that redefines the possibility of display design and image quality. Direct light emission from OLED pixels eliminate backlighting so that it can allow the ultra-slim design and richer colors with vivid accuracy. Based on this revolutionary technology, LG has developed the OLED wallpaper of astounding and eye-catching designed ultra-thin panel which fits in any space.

* Actual product may differ from the image.

UHD Resolution Models with IPS Panel

While once a preserve for premium TV displays, UHD resolution is now the standard and essential for enriching the in-room experience. LG has been leading the industry with a series of UHD models to maximize customer satisfaction. Most LG TVs adopt an LG IPS panel, to deliver clear content with wide viewing angles, regardless of the viewer's position. Each pixel in the IPS panel reproduces realistic colors without distortion, providing immersive view.

* Available lineup may vary by region

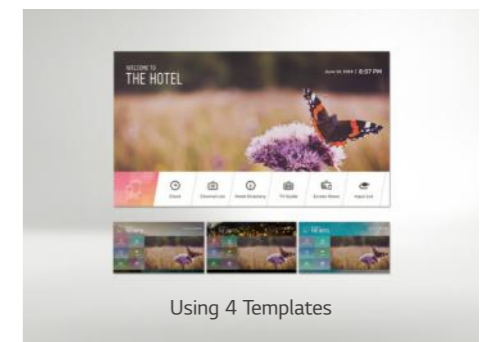

Voice Recognition

From smooth interaction to constant user experience, LG is stepping ahead with its voice recognition tech to lead the commercial TV market, making users easily control LG TVs. Although the technology is still at an early stage, LG has developed stable solutions to substantially enhance product and service competitiveness; ultimately ensuring a successful future of your business.

New Quick Menu

Enjoy LG's simple home menu solution. It provides editable welcome message, date/time and other frequently used menus in the form of bar. These can be all set with a remote control or USB, and guests are able to easily access the menus they want improving satisfaction of their stay. The new Quick menu (Ver 3.0) with many new features like Hotel Promotional Video creation tool, and Quick Manager allows for easy information distribution throughout the same network without a server or USB cloning function.

LG Pro:Centric SMART With OLED
A Premium Smart Solution via IP & RF network

Pro:Centric SMART is optimized for customizing hospitality services for hotel brands and guests through an IP & RF infrastructure. With its high picture quality, sophisticated design and advanced connectivity functions, it upscales in-room entertainment and increases convenience through implementation of high-end technology.

Why OLED Technology

Perfect Black. Intense Color

LG OLED TV provides richness in all colors, boasts aesthetic touch of nature, and lifelike vision. Equipped with over 8 million self-lighting pixels operating individually, the product completes the Perfect Black.

Picture-on-Glass, the Artistic Esthetics

Furnished with sleek design, the product takes its artistic aspect to the next level. As the need for distinct elements like a bezel or a thick stand has been eliminated, the refined but aesthetically breathtaking design intensifies the viewing experience.

* ET961H series has a single-pole stand.

OLED Gallery Mode

OLED Gallery Mode

Bring the wonders of the world to your hotel space with OLED Gallery Mode. From photographs of beautiful places to world-renowned artworks, Gallery Mode provides a great selection of beautiful images and videos. Stunning contents create a perfect atmosphere that suits your visitor's mood.

4K Cinema HDR

4K Cinema HDR

LG 4K Cinema HDR offers the filmmaker's vision by use of HDR formats. Now, a unique cinematic experience is available at hotel rooms with Dolby Vision™ and HDR 10.

LG Pro:Centric SMART

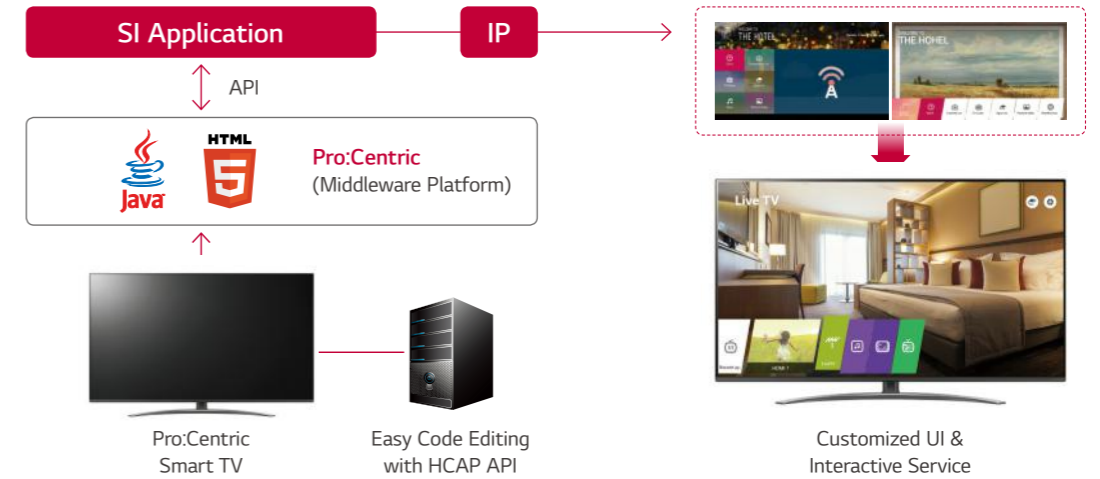

A Premium Smart Solution via IP & RF network

Pro:Centric SMART is optimized for customizing hospitality services for hotel brands and guests through an IP & RF infrastructure.

With its high picture quality, sophisticated design and advanced connectivity functions, it upscales in-room entertainment and increases convenience through implementation of high-end technology.

Pro:Centric SMART Application Platform (IP)

LG Pro:Centric SMART offers extended customizable tools; HTML5, GEM. With these, the partners can optimize Commercial TVs to edit and develop their own enhanced service design. Also, it gives visual impact on and delivers messages to customers as users intend.

* Customized UI may differ

Pro:Centric Application (RF)

You can now differentiate your hotel with our customizable templates and pages which can be specialized for your property. Pro:Centric provides you a solution that is easily customizable for your business.

Various Features

PCA serves the convenience of the guest through a Wake-up setting, Weather Information, Map Service, and much more functions that you can choose.

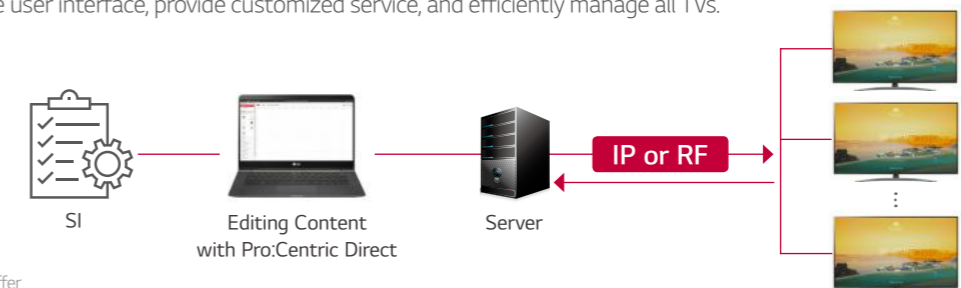

* Customized UI may differ

Customizable Template & Page

Choose an alternative look & feel template based on your reference, and edit multiple sections with 40 pages of billboards by yourself with the web based tool.

Pro:Centric Direct (IP & RF)

Personalize the guest room television experience with the Pro:Centric Direct, which is a hotel content management system that supports simple editing tools and provides guests' access to a variety of additional features, such as an interactive Electronic Program Guide (EPG), weather forecast and customized electronic billboards for information on hotel amenities. These are all conveniently presented through the on-screen menus and controlled by their TV remote control. With this solution, users can easily edit the user interface, provide customized service, and efficiently manage all TVs.

* Actual UI may differ

NanoCell Technology

* Only UT761H is supported now.

Nano Color

LG NanoCell TV reproduces true color by applying about 1nm nanoparticles that filter dull color.

* Available NanoCell TV lineup may vary by region

UT761H / 55"

Nano Bezel

The minimalist design of the Nano Bezel makes you absorbed in the picture.

Nano Accuracy

Nano Accuracy technology enables seamless, smooth motion with low input lag and offers a realistic visual experience with a wide viewing angle.

Nano Slim

Slim & modern design harmonizes with your space.

UHD TV

4K Resolution

UHD is the future of digital pictures, delivering a higher resolution four times than that of full HD. The stunning 8.3 million pixels offers a flawless picture quality and incredibly vivid detail.

4K Upscaler

Enjoy Full HD content in 4K UHD quality. The 4K Upscaler automatically upgrades Full HD content to UHD through a simple six-step upscaling processes.

Smart DRM

Pro:Idiom

DRM (Digital Right Management) technology unlocks access to premium content to help assure rapid and broad deployment of HDTV and other high value digital contents.

Bluetooth Audio Playback

Bluetooth Audio Playback enables users to listen to music on a mobile device through TV speakers via Bluetooth connection.

* Support devices for Bluetooth Audio Playback :
Android (above v4.4 KitKat) iOS based Mobile Device

Smart Experience

webRTC Ready

webRTC allows guests to look and communicate without visiting each other's rooms with video calling, video chat and P2P (Person-to-Person) file sharing.

* Separate server or SI's webRTC-based telecommunication solution is required for telecommunication between two TV sets.

SoftAP

SoftAP is a Software enabled Access Point, which allows the device to create a wireless hotspot.

* SoftAP should be set in installation menu after TV is on.
* Smart Mirroring may not be operated at the same time.

Smart Management

Remote Diagnostics

Save big expenses with the management of commercial TV with Remote Diagnostics. Real-time Remote Diagnostics reports and detects error early in advance to prevent TVs from malfunctioning.

Wake On LAN

Turn on TVs or PCs connected to the network, by transferring a network message with WOL.

LG Pro:Centric v

Comprehensive hospitality solution via RF network

Pro:Centric V provides comprehensive solutions in RF infrastructure. Through the Pro:Centric Server and Application, hoteliers are able to customize their settings in line with hotel branding concepts and deliver information on hotel facilities and wake-up call services, weather forecasts and other messages to guests, all while reinforcing the hotel's brand image.

Pro:Centric Application Features (Version 3.8)

Pro:Centric Application v. 3.8 provides more intuitive and elegant templates than the previous version, and is available in 3 additional languages. This makes it easier for guests to access information and enables managers to deliver messages in a more effective way.

New Templates

Pro:Centric Application (PCA) v. 3.8 provides one new template, making a total of three templates, that customers can select according to their preference.

Welcome Image of PCA v3.8

39 Languages

39 languages including Hebrew, Arabic and Farsi, and language alignment are supported, making your guests' stay more comfortable one.

Right Alignment
(Hebrew, Arabic, Farsi)

Left Alignment
(36 languages)

Easy Content Creation & Management

Customizable Template & Page

Choose an alternative look & feel template based on your preference, and edit multiple sections with 40 pages of billboards by yourself with the web based tool. (Max 15pages / section Available)

* Based on PCA 3.8

Multi Channel Spooling

Operation of up to 8 hotel channels (22 sub-channels) can offer various information and added services.

PMS Interfaced Services

The Pro:Centric Application offers guest-centric services, such as a welcome page with the guest's name, auto language setting and billing information with the Property Management System (PMS) interface.

Welcome Message

Warm greeting message including guest's name.

Automatic Language Setting

Default language settings based on the guest's nationality.

Billing Info

Guest's billing information automatically updated via PMS.

Features

EzManager

EzManager provides a convenient installation function to automatically set settings for the Pro:Centric TV without any extra configuration. Auto-installation requires 1~3 minutes, while manual installation requires 3~5 minutes.

Instant On

The high speed loading system enables users to enjoy content immediately after turning on the TV.

External Clock

Easily attach an external clock to your hospitality TV. Guests can quickly check the time just by looking at the TV, and all it needs is an RGB interface connection.

One Channel Map

The One Channel Map feature allows users to edit and list the channels of their choos from any of the various broadcasting signals.

Features

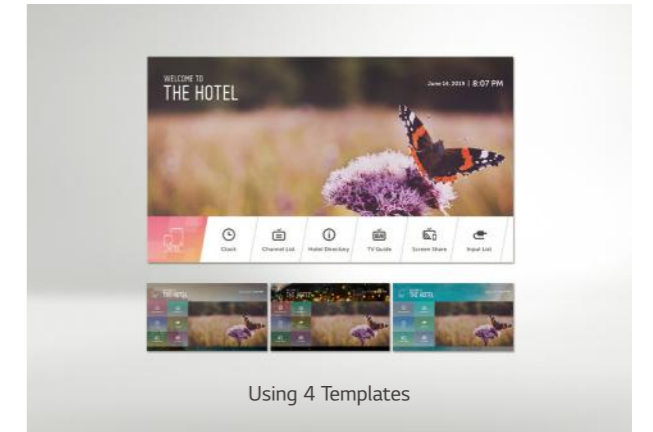

Commercial Swivel Stand

Expand the range of comfort for the guests with a commercial grade stand by allowing them to watch a TV from any angle.

Quick Menu

Enjoy LG's simple home menu solution. It provides editable welcome message, date/time and other frequently used menus in the form of bar. These can be all set with a remote control or USB, and guests are able to easily access the menus they want improving satisfaction of their stay. The new Quick menu (Ver 3.0) with many new features like Hotel Promotional Video creation tool, and Quick Manager allows for easy information distribution throughout the same network without a server or USB cloning function.

LG Signage LITE (Smart TV Signage)

Live TV and Advertisements on One Screen

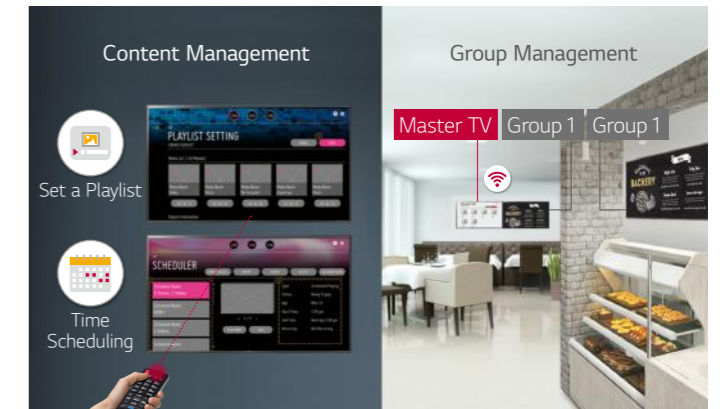

LG Signage LITE enables both TV broadcasting and promotional display in one screen via a built-in TV tuner. With Signage LITE, managers can efficiently and timely deliver messages / promotion while customers enjoy watching live TV simultaneously. Signage LITE will help you achieve efficient operation.

Features

Embedded Content & Group Management

The embedded Content and Group Management System allows you to edit and play content, schedule playlists and groups, and control Signage via remote control, mouse and mobile phone without the use of separate PC or software. This makes content management much easier and more user-friendly.

* These images are provided for illustrative purposes, and the actual GUI may differ.
 * All displays must be connected to the same network.

USB Data Cloning

USB data cloning increases efficiency in managing multiple displays for optimal operation since users don't have to set up each display one by one. Once users copy data to a USB device in one display, it can be easily distributed to the other displays through a USB plug-in.

RTC

Save time and improve convenience with RTC (Real Time Clock). Even when the TV is off, time information is stored on the RTC module via an internal memory, so there is no need to sync time processes.

Features

NTP

With NTP (Network Time Protocol), the TV receives real time updates from the network and synchronizes its time accordingly.

- Crestron Connected® (Network Based Control)
- WOL (Wake On LAN), SNMP
- DPM (Display Power Management) Mode
- USB Data Cloning
- RTC (Real Time Clock), NTP (Network Time Protocol)

SuperSign Control

SuperSign Control is the basic control software, and it can manage up to 100 displays through a single account and server. Power, volume, and scheduling can be remotely adjusted, and firmware updates are supported.

SuperSign CMS

SuperSign CMS is a content management software solution optimized for LG webOS signage. It supports multiple displays and accounts, can be linked to external databases, and the server can be remotely access from mobile devices.

LG Signage LITE (Commercial Lite)

Essential signages tailored to Commercial Environments

Improve management efficiency and offer a warm welcome to guests. Featuring Welcome Video / Image, USB Cloning and other convenient functions, LG Signage LITE is able to lighten the management burden and makes customers feel cared for in numerous business environments.

Features

USB Auto Playback+

Create and play personalized media playlists (video, music, images) without a PC or installation.

Time scheduler

Set up Signage LITE to be turned on and off automatically during personalized operational hours and work days.

USB Data Cloning

USB data cloning enables more efficient management of multiple displays for optimal operation and viewing. For content management updates, users can simply copy data to a USB in one display and then easily distribute it to other displays through a USB plug-in.

Features

Welcome Video / screen

With the capability to play various video formats and images, Commercial Lite TVs offers a greater variation of greeting messages in hotel rooms to make customers feel more welcome and cared for.

Hotel Mode

Be in total control with Hotel Mode. Change TV settings or reset settings to default for every room at once.

Multi IR

Multi IR function eliminates the remote control signal interference between TVs for multiple devices.

* Only available for LG TV models

Features

External Speaker Out

Enhance the entertainment experience with an additional speaker. Guests can listen and control the TV audio from anywhere, even from restrooms.

IR Out

Using the interactive set-top-box, all LG TVs can be controlled with a single remote control.

RS-232C

Via the TV's RS-232C port, remotely control power and volume settings at the same time.

Features

Compatibility with AV Control Systems

This LG TV has Crestron Connected® Certification, a function that is dedicated to meeting room and that meets the growing need in corporate meeting space market.

* It is a network based control system.
Available AV control systems may differ by regions.

Real-Time Remote Monitoring

In case of malfunction or errors, real-time remote care can be configured. If an error occurs, immediate notification is sent through the SNMP (Simple Network Management Protocol) to facilitate oversight and troubleshooting.

WOL (Wake-on-LAN)

WOL (Wake-on LAN) enables users to send a message throughout the network to power on displays.

* Actual product appearance may differ from the above simulated scene.

LG Healthcare TV (Arm TV)

Personal Healthcare Smart Touch Screen TV

Provide your patients with the smart solution, LG ARM TV, for a superior hospital experience.

It enables personalized interactive service with its multi touch screen, Pro:Centric Solution and webOS operating system, which is the optimal platform for Patient Engagement Providers in the industry. Its industrial panel is durable and will sustain long operation. And the LG IPS panel technology provides great viewing angles for multiple viewers in a hospital environment.

Features

Intuitive Multi-touch Display

This touch screen recognizes the presence of more than two points of contact with the surface, allowing more users in a hospital setting to experience interactive services (e.g, doctor and patient) and entertainment (e.g, patient and family).

Reliable Operation

The Industrial panel located inside allows the product to sustain long operation hours. So, LG ARM TV is a reliable TV solution that can be used in hospital environment without a need for addressing unexpected fault.

Antibacterial Properties Applied

Antimicrobial properties are applied to plastic Housing of LU766A series. Its treated plastic housing conforms with ISO 22196 standard measuring antimicrobial activity that inhibits the growth of bacteria that may affect the plastic housing. Thus, it is necessary for enhanced medical environment (medical efficacy).

Cleanliness, Safety and Convenience

LCD panels of the LU766A series are designed to be able to be cleaned or used thoroughly without issues, and the stylish, rounded corners of the TV reduce the possibility of injury due to accidental bumping into staff, patients or family visitors.

* NOTES :
 - Antibacterial Properties : Antimicrobial properties do not protect users against bacteria, viruses, germs or other disease causing micro-organisms.
 - External plastic housing excludes the front LCD panel.
 - ISO 22196: Measurement of antibacterial activity on plastics and other non-porous surfaces.
 * Actual product appearance may differ from the above simulated one.
